

OUR SERVICES

PRIVATE DETECTIVE & CYBER CRIME INVESTIGATION SERVICES

PHISHING, EMAIL & WEBSITE HACKING INVESTIGATION

- Phishing, email compromise, and website breaches put businesses and individuals at immediate financial and reputational risk.
- Our investigation service uncovers how attackers gained access, maps their infrastructure, and produces legally admissible evidence to support takedowns and prosecutions.

IDENTITY THEFT & DEEPFAKE INVESTIGATION

- Identity theft is one of the fastest-growing cybercrimes, where a criminal uses someone else's personal information to commit fraud or damage their reputation. Our team investigates cases involving fake identities, fraudulent KYC usage, SIM swap attacks, cloned profiles, and unauthorized use of documents or credentials.

REVENGE PORN / CYBER BULLYING & HARASSMENT INVESTIGATION

- We assist victims facing online abuse, stalking, threats, extortion, or defamation on social media or messaging apps.
- Our team collects digital evidence, provides expert guidance for legal complaints (FIR or Cyber Cell reports), and ensures professional confidentiality during the process.

FAKE SOCIAL MEDIA PROFILES INVESTIGATION

- Criminals often create duplicate social media accounts using a victim's name, photos, and bio to deceive followers, scam contacts, or harm reputation.
- Our team provide professional investigation services to trace the origin of such fake accounts, identify the person behind them, and collect digital evidence for legal action.

FRAUDULENT DIGITAL LOAN INVESTIGATION

- Cybercriminals often misuse stolen personal information such as Aadhaar, PAN, or banking credentials to apply for loans under someone else's name.
- Our team provide specialized investigation services to trace the source of the fraud, analyzes loan application data, IP logs, device fingerprints, and communication records to uncover how and where the fraud originated.

FAKE BUSINESS AND JOB SCAM INVESTIGATION

- Cybercriminals frequently create fake companies, job portals, or recruitment profiles to deceive job seekers and collect money, personal data, or identity documents under the name of employment opportunities.
- Victims are often asked to pay registration fees, submit IDs, or share bank details, only to discover later that the company or recruiter never existed.
- We provide comprehensive investigation services to identify and expose such fraudulent businesses and recruiters.
- Our experts use domain analysis, email forensics, IP tracking, and OSINT techniques to trace the origin of the scam and gather verifiable digital evidence.
- We also help victims file official complaints with cyber cells, job portals, and legal authorities, ensuring their identity and data are protected from further misuse.

DISCLAIMER

SPYRIOT SECURITY — LEGAL & COMPLIANCE NOTICE

- Spyriot Security Pvt. Ltd. conducts all cyber-crime investigations strictly in accordance with applicable legal procedures and Indian laws, including cyber regulations and relevant statutes. We work professionally with victims, private clients, and with law-enforcement agencies when required, providing technical analysis, evidence collection, and documentation that meet legal and chain-of-custody standards.
- **Please note:** Spyriot Security does not provide any service to track, unlock, or locate lost or stolen mobile phones or any other illegal's hacking activities . We will not assist in any activity that bypasses lawful processes or invades personal privacy outside of sanctioned investigative work.
- Our mission is to support victims of cyber-crime and help secure digital spaces. We are committed to pursuing justice for those harmed online and to reducing digital harassment — with particular focus on protecting women and vulnerable groups. We undertake every investigation with confidentiality, integrity, and full compliance with the law, and we will cooperate with authorities to ensure appropriate legal action is taken.
