Empowering African Students | Spyriot Security

I am honored to have collaborated with a prestigious African organization in New Delhi, where I spearheaded a comprehensive training program on cyber security and ethical hacking for their esteemed students.

The highly interactive and immersive training, expertly delivered by Spyriot Security, garnered overwhelmingly positive feedback from participants, who praised the program's relevance, depth, and engagement.

This achievement was further underscored by the organization's expressed interest in inviting Spyriot Security to participate in future initiatives in Africa

A distinction that not only underscores the program's success but also acknowledges our expertise and commitment to cultivating a secure digital landscape. A distinction that underscores the program's impact

We are excited to explore further opportunities to contribute to the development of a skilled and secure digital workforce in Africa.

Cyber Security Training for Indian Army, Indian Police and Students

“Empowering India's Digital Defense: Spyriot Security's Comprehensive Cyber Security Training Initiatives”

Spyriot Security, a leading cyber security solutions provider, is proud to announce its ongoing collaborations with esteemed organizations across India, including the Indian Army, Indian Police Forces, and prominent educational institutions.

Cyber Security Capacity Building: Spyriot Security's Strategic Partnerships with Indian Defense, Law Enforcement, and Education Sectors.

By investing in India's cyber security future, Spyriot Security reaffirms its commitment to protecting the nation's digital infrastructure and cultivating a skilled cyber workforce.

About
Our CEO:

Founder of Spyriot Security

Debadutta Chandan Dash

A highly dedicated Indian Cyber Crime Investigator and the founder of Spyriot Security. Since 2020, Debadutta has been at the forefront of cybersecurity training and investigation, providing hands-on learning experiences through real-world projects and working closely with law enforcement agencies to solve complex cyber crime cases. He has trained students, corporate professionals, and government personnel. He also leads digital marketing and telecalling efforts to promote his training programs. His initiative includes an innovative e-learning platform tailored for rural students, delivering quality education through accessible online courses. Currently, Debadutta is expanding his reach across the globe. He has already taught professionals from Africa, Nigeria, Zimbabwe, and Germany, reflecting his growing international presence. His vision is to empower the next generation of cyber defenders and promote a safer digital world for all. He frequently speaks at seminars and workshops to raise awareness about cyber threats and digital safety. His work has not only built technical skills but also inspired many to pursue careers in ethical hacking and cybersecurity.

OUR MISSION

Spyriot Security's mission is to empower students with advanced knowledge and skills to combat cyber threats and safeguard Country's digital resources. Our training programs promote ethical hacking & cyber crime investigation practices and responsible use of cyber security techniques.

IMPORTANT DISCLAIMER

1

Ethical Hacking

Our training emphasizes ethical hacking practices and responsible use of cyber security techniques.

2

Legal Use

We emphasize that our training is solely for educational and security purposes. Any misuse of the skills and knowledge gained through our programs for illegal activities is strictly prohibited and against our terms of service.

3

Responsibility

By enrolling in our courses, you agree to use the knowledge and skills acquired for legitimate and lawful purposes only. You will be solely responsible for any consequences resulting from misuse of the skills and knowledge gained through our training programs.

- Unauthorized access to computer systems or networks
- Malicious hacking or cyber attacks
- Data theft or intellectual property infringements
- Any other activity that violates applicable laws and regulations
